DETAILED ACTION

This Office Action is in response to preliminary amendment filed on October 12, 2000, Paper No. 2. Claims 24-26 are pending in this Action.

Information Disclosure Statement

The information disclosure statement filed in Paper No. 2, 3, 4, 5, 6, 7 have been considered.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 24-26 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 3, and 4 of U.S. Patent No. 6,182,083 issued to Scheiffler et al. ("the '083 patent"). Although the conflicting claims are not identical, they are not patentably distinct from each other because of the following reasons.

Art Unit: 2172

Claims 24-25 differ from the patented claims 1, 3, and 4 as such they do not explicitly indicate a request that includes a take or read operation and a step of removing a matched entry from a database. The subject matter covered in claims 25-26 is taught by multitemplate as recited in claim 1.

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the invention recited in claims 1, 3 and 4 by including the step of removing a matched entry in a database to improve system performance such that the entries to be visited in a database in response to each of subsequent requests will be reduced. The memory space required to store the entries will be minimized and the system will have more memory space available for other purposes.

Claims 25-26 are rejected under the same rationale given to claim 24.

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
